Firefox ...................................................................................................................................................... 2
Chrome .................................................................................................................................................... 3

Internet Explorer

When opening the page you may get a message advising ‘Only secure content is displayed’. Click on Show all content.
The videos should now load.
Firefox

Click on the information image. A pop up box will open that says Firefox has blocked parts of the page that are not secure, click on the arrow next to this sentence.

A new box will open with a button that says Disable protection for now, click on the disable button.

The videos should now load.
Chrome

Open the page containing the video.
Click on the shield on the right hand side of the screen

The pop up box that appears when you click on the shield says Insecure content blocked.
Click on Load unsafe scripts.
The videos should now load.
